PROFILE

Full Stack Engineer with 6+ years of experience building enterprise web applications, APIs and cloud-hosted solutions. Strong background in Angular, React, Node.js, TypeScript, JavaScript, Java, Spring Boot, REST API design, data modelling, CI/CD, Azure and AWS. Served as lead engineer on a public-facing platform supporting over 2 million annual visitors and generating more than 20,000 leads per year, with responsibility spanning solution design, implementation, deployment and ongoing enhancement. Most effective when owning problems end-to-end, collaborating closely with stakeholders and engineering teams, and translating business requirements into practical technical solutions. Proven ability to lead technical initiatives, communicate effectively, contribute to architecture decisions and deliver high-traffic systems. Quick to learn and adopt new technologies, with a track record of successfully delivering solutions across multiple platforms and technology stacks.

TECHNICAL SKILLS

- **Frontend:** Angular, React, Next.js, TypeScript, JavaScript, HTML, CSS, LWC
- **Backend:** Node.js, Java, Spring Boot, REST APIs, OpenAPI/SwaggerHub, JWT, OAuth, Apex
- **Cloud & DevOps:** Azure, AWS, Docker, Kubernetes, Jenkins, Git, CI/CD
- **Databases & Data:** PostgreSQL, SQLite, SQL, NoSQL, Data Modelling
- **Testing:** Jest, Unit Testing, Integration Testing, End-to-End Testing, TDD
- **Leadership:** System Design, Solution Design, Technical Leadership, Stakeholder Engagement

EXPERIENCE

Full Stack Engineer - Fidelity Investments, Dublin

August 2020 - Present

- Served as the primary technical representative for an Agile team, translating stakeholder requirements into scalable technical solutions and collaborating across business, architecture and engineering teams.
- Owned a public-facing platform serving over 2 million annual visitors and generating more than 20,000 leads annually, supporting traffic growth of over 200% since 2022 through continuous enhancement and delivery of new functionality.
- Operated as sole engineer responsible for the platform for almost two years before transitioning into a deputy technical lead role, demonstrating the ability to both independently own delivery and contribute effectively within larger engineering teams.

-
- Acted as technical lead across multiple initiatives, contributing to technical planning, solution design, and cross-team coordination.
 - Led the design and delivery of production web applications using Angular and Node.js, delegating tasks and making key decisions around frontend architecture, API integration, deployment strategy and cloud hosting.
 - Contributed across multiple enterprise applications spanning Angular, Node.js, Java, Spring Boot, Salesforce, REST APIs and cloud services working across frontend, backend and integration layers.
 - Delivered cloud-hosted solutions using Azure and AWS services, CI/CD pipelines, Git, and Jenkins to support scalable application delivery and release reliability.
 - Designed and integrated REST APIs using OpenAPI/SwaggerHub specifications to enable communication between frontend applications, backend services and third-party platforms.
 - Developed and maintained solutions on Salesforce Experience Cloud using Lightning Web Components (LWC), Apex, and platform-native capabilities.
 - Implemented integrations with external analytics, chatbot, lead generation and marketing platforms to support customer acquisition, business intelligence and user engagement.
 - Contributed to architecture discussions covering authentication, authorization, API design, cloud deployment, data management and system scalability.
 - Mentored team members, promoted engineering best practices, and contributed to code quality, technical standards and knowledge sharing initiatives.
 - Participant in an org-wide AI innovation initiative focused on evaluating and prototyping AI-assisted engineering solutions to improve developer productivity and software delivery with great results.

Software Development Tutor - University College Cork

September 2019 - May 2020

- Delivered tutorials in object-oriented programming via VB.NET and SQL to BIS students.
- Supported learning through hands-on teaching and problem-solving guidance.

IT Services Management Analyst - Ervia (Gas Networks Ireland), Cork

March 2019 - August 2019

- Worked primarily on incident and problem management processes.
- Contributed to system improvements and service delivery initiatives.

EDUCATION

BSc (Hons) Business Information Systems (2:1) - University College Cork

September 2016 - May 2020

- Final Year Project (1:1)
 - Developed an Android application to help students manage personal finances.
 - Implemented using Java with a SQLite database and integrated third-party APIs (e.g. Google Vision).

CERTIFICATIONS

- Salesforce Certifications (Platform Administrator and JavaScript Developer)
- ITIL Foundation
- Lean Six Sigma (White Belt)
